STACK DRYER /TROUBLESHOOTING THE MOTOR

Troubleshooting The Motor.

- During operation, check for voltage 120(VAC) on red wire leading to the motor.
- If 120(VAC) is present on red wire and motor does not turn then the motor needs replaced.
- If Voltage 120(VAC) is not present on red wire then there is an issue with either the relay contactor, controller or door switch.
