

DDAD REPLACING A BROKEN BELT

Broken belt.

- Remove broken belt from the rear of dryer

Reinstall motor belt.

- Loop belt around the motor assembly, the belt will be resting on the motor mounting bolts.
- Starting with the top bolt, remove (1) motor mounting bolt at a time, slide belt to the inside of the motor mounting bolt and replace the bolt.
- Repeat this step on the top left and bottom bolt only. The 3 o'clock bolt will not be removed.
- Apply belt on to motor pulley and to the top of the intermediate pulley. Turn the pulley clockwise to walk the belt on the pulley.
- Reinstall drive belt from the intermediate pulley to drive pulley in same manner.
