A CLEAN YOU CAN TRUST

Dirty, soot-covered turnout gear used to be a badge of honor. It was a sign of courage and willingness to put your life on the line. However, fires today are more dangerous than in the past. The days of solid wood and natural fibers have given way to synthetics and plastics. This makes for hotter, faster and more dangerous fires, filled with carcinogens. In this new environment clean gear has become a vital part of the job.

We understand the importance of cleaning your gear properly to ensure that it continues to keep your crew safe. Every Dexter product is proudly built and assembled in the USA by our team of qualified craftsmen.

We employ local firefighters as engineers, welders, assemblers, and service technicians. We take their safety, and yours, very seriously. That's why all Dexter washers & dryers are designed to meet the NFPA 1851 guidelines.

All Dexter washers and dryers are designed to be NFPA 1851 COMPLIANT for the safety of your crew.

THE PRODUCTS YOU NEED

NFPA 1851 COMPLIANT

Our products are designed to show-up to work cycle after cycle in even the harshest environments. Designed to meet NFPA 1851 guidelines, our machines are durable, yet flexible enough to handle all of your firehouse needs.

PRODUCTS TO FIT YOUR NEEDS

Choose between our state-of-the-art O-Series control or our standard 6-cycle control with simple, programmable options to fit your laundry needs.

ULTIMATE FLEXIBILITY

INDUSTRY-SPECIFIC CYCLES

Our O-Series controls offer preset cycles specific for turnout gear and other firehouse laundry. With 100 programmable cycles and many customizable options you can create any cycle you need. All of the programming options are easy to set using [DexterLive.com](https://www.dexterlive.com).

TEMPERATURE RECORDING

Temperature recording is available on select O-Series washers to ensure that NFPA 1851 guidelines are met.

PEACE OF MIND

SAFE TURNOUT GEAR CYCLES

Correctly cleaning your turnout gear is vital to your crew's safety. All of our washers are available with low extract speeds and our dryers offer no-heat cycle options to keep your gear safe and clean. Preset turnout gear cycles are available on O-Series washers.

FIRE RESPONSE SYSTEM

O-Series dryers feature our Fire Response System which senses when a load is unexpectedly increasing in temperature. Water-based response models are available.

QUALITY YOU CAN TRUST

PROVEN RELIABILITY

Every washer model is designed to withstand our extreme 1,000 hour test, running at maximum extract with an extreme out-of-balance load.

INDUSTRY-LEADING WARRANTIES

Our industry-leading warranties cover washers for 10 years and dryers for 5 years. A 3-year parts warranty covers the rest. Plus, all of our products are backed with lifetime technical support.
