

CHECKING/CLEANING THE PRESSURE SWITCH HOSE

“Slow Fill, Slow Drain, F2 , F8 ”

Step 1 – Shut off power supply

Step 2 – Remove top panel

Step 3 – Remove lower service panel

Step 4 – Remove pressure switch hose

- Locate pressure switch hose under the wash tub.
- Loosen the 5/16 hose clamp and remove the hose from coupling.
- Remove the top end of the hose from the pressure switch.

Step 5 – Inspect & clean hose

- Inspect both ends for blockage.
- Flush with water to remove possible obstructions.
- Follow these steps in reverse order to re-install the pressure switch hose.
